MEMPHIS, TRENA, April 22, 1872.

Mesors, Milburn, Walker & Co.:
Having examined some work executed by the Planter's Machine, I have no hesitation in saying that it is a decided success. The plowing is perfect, and the ridges formed at the same time are much superior to those made in the old style. They are uniform, and it is hard to distinguish one from the other. I commend it as a labor-saving machine, and trust it will be liberally paircuized by the planters of the South.
